

CLEVER - BUILD-IN ETHANOL FIREPLACE

le feu

EVERY HOME DESERVES A WARM HEART

LE FEU CLEVER

ELEGANT AND INTELLIGENT COSINESS

The CLEVER series is a fully automatic bio fireplace of the future, which can be operated via the App, remote control, or the digital panel on the bio fireplace.

Le Feu's automatic burners have been created with even the smallest details in mind - From automatic filling of bioethanol to the intuitive and user-friendly operation of the fireplace.

The CLEVER series raises the bar for the design and expression of the bio fireplace of the future. The burner's round shape and the matt black Le Feu signature surface are the essence of Danish design and craftsmanship.

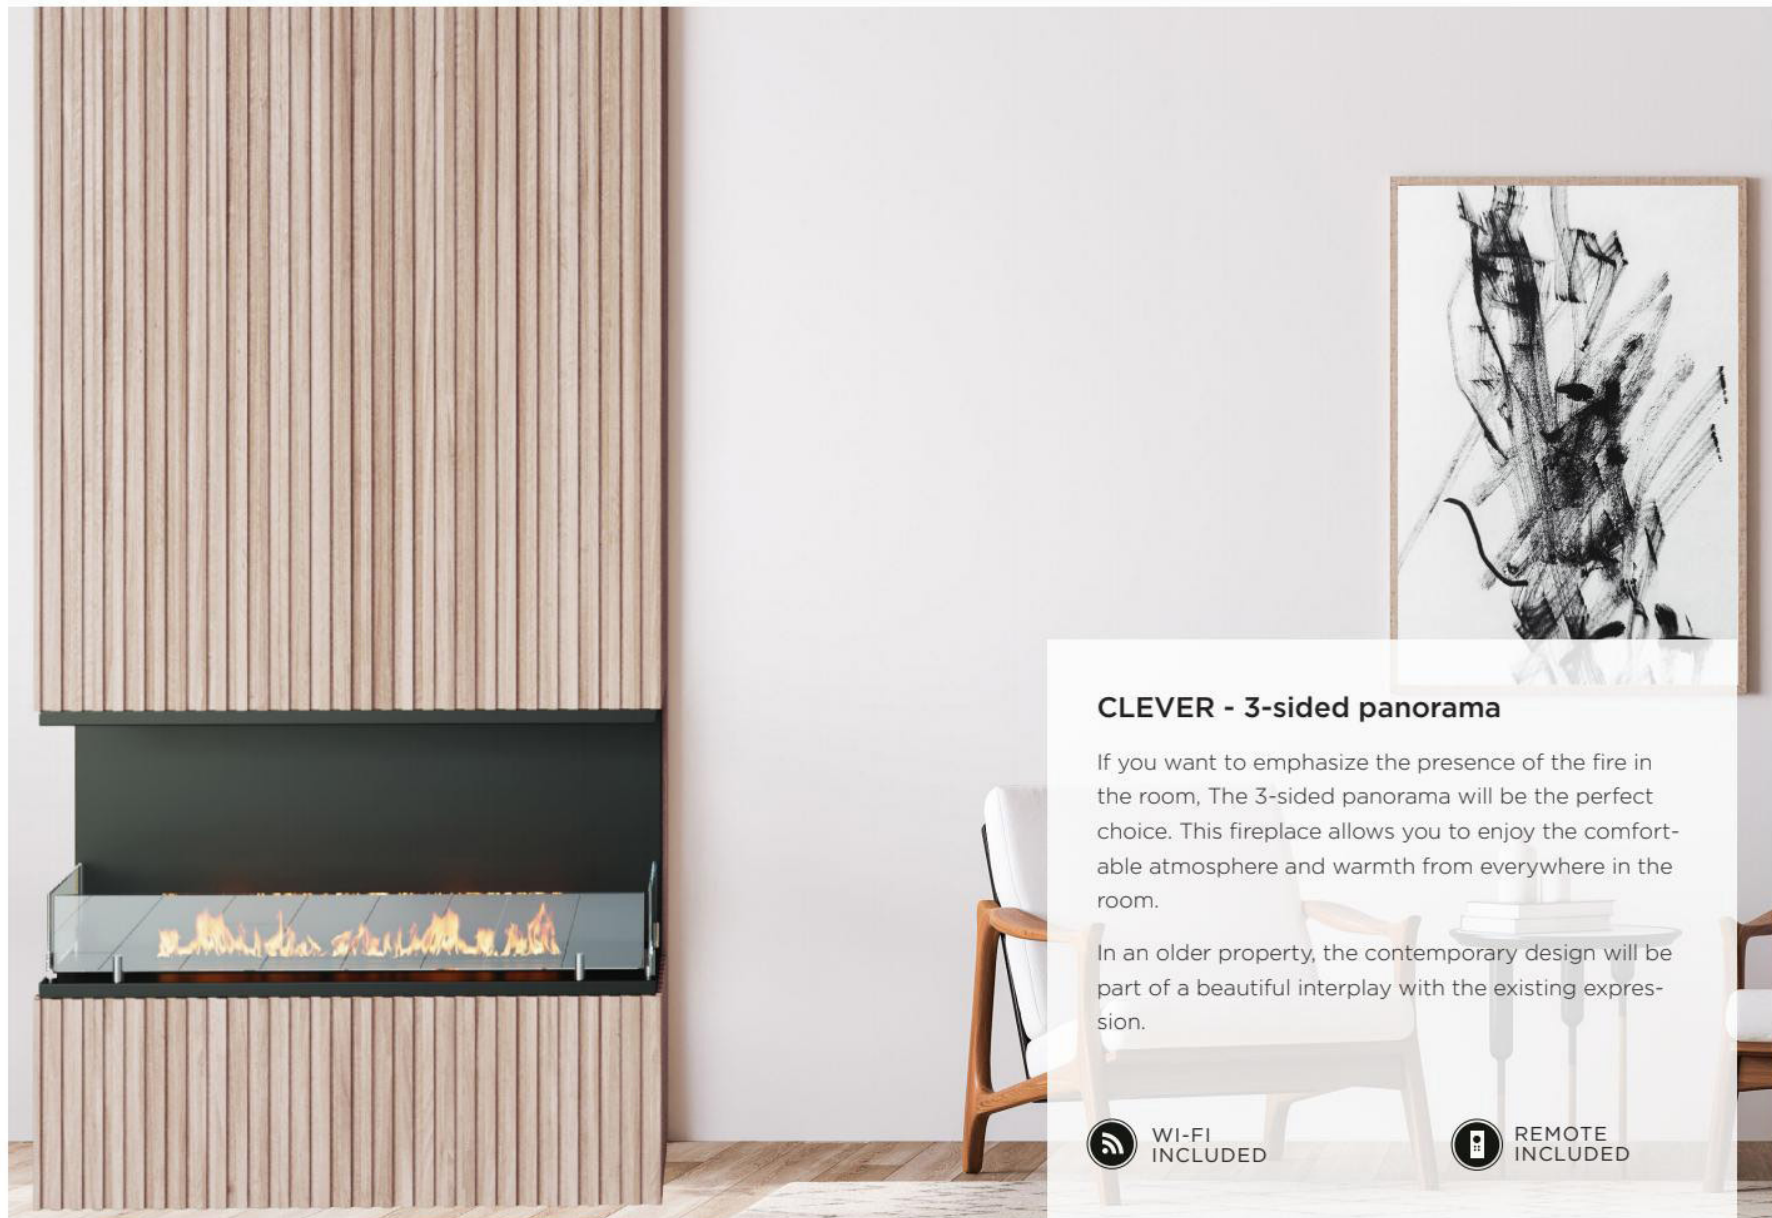

Our ambition to be the world's leading biofireplace manufacturer, goes hand in hand with a desire to inspire innovation and dynamism in the interior design with real living flames - in every home.

We want our customers to experience the authentic Danish cosiness, the stylish design and natural care for the environment.

The bio fireplaces are suitable for both new construction and installation in existing properties. The installation is simple and requires no extraction or chimney.

- Every home deserves a warm heart

MODEL SIZE/cm	FLAME LENGTH/mm	CAPACITY/L	CONSUMPTION L/H	HEAT EFFECT/W
60	329	3	0.5 -0.6	2600-3300
